Data Engineering

Friday's | 9:00-10:45am or 5:00-6:45pm
Jacobs 474
6 MetroTech Center

Text, images and recording can provide data to inform business decisions. However, business analysts need to connect problems and solutions through the information behind the data. Experience with tools for programming, querying, and data-flow can prepare you to explore possibilities in technology and entrepreneurship. This course will enable you describe patterns and predict associations to help handle operational requirements and meet strategic goals.
